Executive Summary

The scope of this study is to understand the potential economic benefits of a health collaborative with the University of Kansas Medical Center, Wichita State University, and WSU Tech on the Wichita regional and downtown economies.

- Induced impact An induced impact measures the household effect from increased demand from an initial change or direct effects.
- Labor income impact Labor income includes all forms of employment income and encompasses employee compensation and proprietor income.
- Location quotient A location quotient measures an industry's relative concentration.
- **Multiplier** A multiplier captures the inter-industry effects of a change to a primary sector. A value greater than one indicates a positive impact on the economy for every dollar or job created.
- Output impact An output effect measures the total value of a business's production and equals revenues.
- Tax on corporations Corporation taxes include dividends and corporate profits.
- **Tax on households** Household taxes include income, fines and fees, motor vehicle license, property, and fishing and hunting.
- **Tax on production** Production taxes include sales, property, motor vehicle licenses, severance, other related taxes.
- **TIPU sector** The TIPU sector includes transportation, information, and public utilities.
- Total impact A total effect adds the direct, indirect, and induced effects to estimate the
