

---

A report is available to assist you in the review and error correction of sections

NOTE: Some “errors” on the report are there to alert us to the use of something that should be double-checked (e.g. room override). They may not be an error but the report is listing them so you can ensure the entry is correct. Codes [redacted] below are the “warning” types for which you may find your entry is not an error at all.

The following provides explanation for each error/warning code.

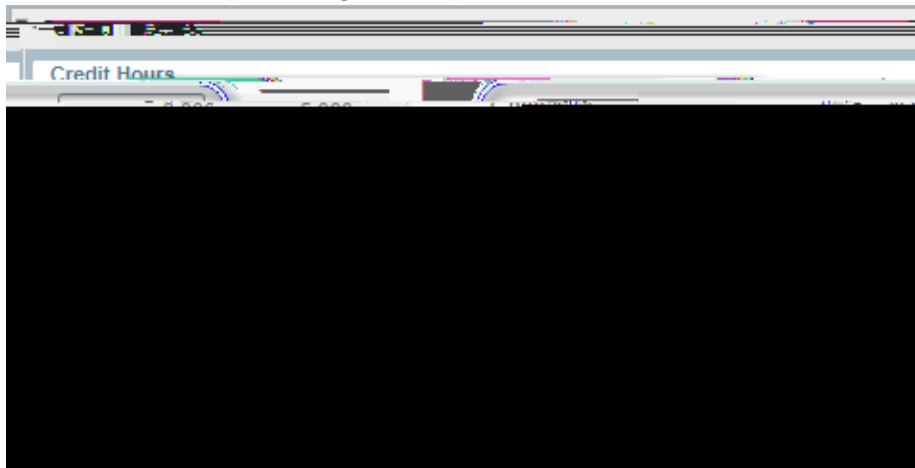

[redacted] = the dates on the Meeting Times and Instructors/Meeting Dates tab in SSASECT are not consistent with the POT. The dates entered here should be the actual dates and should fit within the POT selected on the Course Section Information tab. It may be correct that they are different from POT.

Start Date *	End Date *	Meeting Time	Meeting Type
02/22/2019	02/22/2019		CLAS
02/23/2019	02/23/2019		CLAS

[redacted] = dates and times have been entered but no days have been selected.

[redacted] = dates and days have been entered but no times.

[redacted] = courses that can be offered for a range of hours must have the number of hours for the specific section entered on the first tab in SSASECT (see image below).

[redacted] = Is a warning if CRN uses OHY method and has days/times – this should only be the case if the course is taught online synchronously and requires in-person exams/assessment. Dates/times for exams if students come to take them on-campus (OHY) should be detailed in SSATEXT.
